

American Safety & Health Institute is a leading provider of CPR, AED, and first aid training programs, as well as courses in advanced emergency care and resuscitation.

Flexible Training Options

With ASHI's dynamic, effective instructional materials, including skill guides, DVDs, and PowerPoint presentations, instructors can tailor their classes to best suit their teaching style. ASHI Training Centers offer courses in classroom and blended learning formats.

ASHI CPR, AED, and first aid training programs are ideal for instructors with emergency medical or other healthcare expertise. And we meet all requirements for CECBEMS-accredited professional responder training with our CPR Pro, ACLS, and PALS programs.

We Make Learning to Save Lives Easy.®

“As a student you can't ask for better educational tools! We have easy access to learning at our fingertips and depending on how we learn best, there's a multifaceted approach that ensures we retain what we learn, whether in the classroom, online, or by watching a video.”

Debra Waller

Chief Instructor and Owner

Advanced Care CPR
Denver, Colorado

ASHI Programs

Basic First Aid

Created to help students develop basic first aid knowledge, skills, and the confidence to respond.

CPR and AED

A combined CPR and AED program designed specifically for laypeople.

CPR Pro for the Professional Rescuer

Designed for individuals in the healthcare or professional rescuer field that are required to have a professional-level basic life support training.

Bloodborne Pathogens

Helps students understand what bloodborne pathogens are and how risks of exposure can be reduced for themselves and others.

Pediatric CPR, AED, and First Aid

An ideal training solution for schools, child care providers, youth sports coaches, and others required to learn how to respond to medical emergencies involving children.

Child & Babysitting Safety (CABS)

Teen-friendly course book reviews the business of babysitting, proper supervision, basic caregiving skills, and responding properly to ill or injured children or infants.

Emergency Oxygen

Administering emergency oxygen to breathing and non-breathing persons, emergency oxygen delivery systems, and integrating pulse oximetry.

Advanced First Aid

17-21 hour course presenting many of the most common illnesses and injuries responders are likely to encounter.

Emergency Medical Response

Provides non-EMS responders with a level of training comparable to a professional Emergency Medical Responder.

Advanced Cardiac Life Support (ACLS)

Meets requirements established by a wide variety of professional associations, councils, academies, and medical boards.

Pediatric Advanced Life Support (PALS)

Intended for emergency personnel in intensive care or critical care departments and emergency medical providers responsible for the well-being of infants and children.
