Heart Trac

AED Program Management and Medical Oversight Services

The Heart Trac program includes:

- Assessment of your emergency response preparedness
- Assistance in choosing an administrative contact for each facility
- Assignment of an AED Program Specialist
- Development of comprehensive Emergency Response Plans and AED protocols
- Determination of the most appropriate locations for your AEDs and proper installation
- Review of the applicable federal, state, and local regulations
- Registration of your AEDs and their locations with the local EMS department
- Documentation using the forms required in each jurisdiction

Medical Direction and Oversight Services

- National Medical Director team of licensed, board certified physicians
- Your program's Medical Director
 - Can write prescriptions necessary for each AED you purchase
 - Ensures you have the right AED for the setting and your program is properly authorized
 - Uses the information gathered by your AED Program Specialist to develop site-specific AED program policies and procedures, Emergency Response Plans, and AED Protocols, to ensure your compliance with state and local regulatory requirements
 - Analyzes the data the AED gathers during a cardiac event

The Heart Trac system:

- Automatically notifies your AED administrative contact via email about pending expirations of consumable products and the timing of scheduled maintenance
- Allows placing orders for needed replacements right online
- Documents your AED program by tracking and reporting on AED/CPR training, testing and certifications
- Makes it easy to check who is up to date on their training and who should be scheduled for a recertification course
- Provides round-the-clock access to your facility's AED program policies and procedures, AED protocols, Emergency Response Plans, regulatory notification dates, and contact information for AED program personnel

Call (267) 685-9560 today for a free Heart Trac demo.
